

Don

Here is the picture from the day we spoke about 2037 S 14th (Ignore the date as the camera wasn't reset after the battery was changed). The second copy shows the approximate lot line with all the debris to the right side (south) of the picture being behind the neighbors property at 2041 S 14th. The step with the red item on it is our property. While most of the debris was behind the neighbors we got gigged for \$100 and the neighbor doesn't even receive an order despite their yard being in disarray for many years.

Here are pictures from this past Thursday, showing the two adjoining properties to the south.

I am sorry, but your inspector claims that he was unbiasedly writing orders based only on debris in the yards, without regard to ownership does not bode true.

This is just wrong. The only explanation is illegal targeting our company with the intent to cause economic harm. This is wrong and will be addressed by me.

Unfortunately it appears from your response to this incident that you are sanctioning these acts by your inspectors. This narrows my options to court action, which I will focus on the individuals responsible.

---

**2041 S 14th adjoining property without orders** (The one with most of the debris in the above picture)

And 2045 S 14th (Two doors south)
